

Abstract

Accessories and methods for directly suspending clothing from a mounted rod. An opening is provided in the clothing, the opening communicating with an edge of the product and having both an open configuration and a closed configuration, with a supporting material such a loop fastener or a backing material integral with or attached to the clothing. The supporting material includes the opening and can be moved from the open to the closed configuration and back, allowing the product to be easily attached to and detached from a rod, hook, and so forth, without the need to use a hanger.

Patent Application No. 10/000,000
